EDUCATION

Bentley University

Bachelor of Science, Data Analytics and Finance
General Finance Concentration and Minor in Business Management
Dean's List

Waltham, MA

Expected Graduation: May 2027

PROFESSIONAL EXPERIENCE

DHL EXPRESS

Plantation, FL

Finance Intern

June 2026 – August 2026

- Designed and built a new AR reporting capability from scratch, delivering aging, UAC, and country/customer reporting through Power Query, Office Scripts (TypeScript), Power Automate, and a custom interactive HTML dashboard.
- Engineered an automated Statement of Account (SOA) reporting solution for DHL key-account collections, replacing manual statement preparation with a scalable workflow that generated customer-specific reports with automated distribution, saving 8-10 hours per week and advancing AR process digitalization.
- Partnered with Finance, Collections, and CFSC stakeholders across the Americas region to identify process inefficiencies and deliver automation that returned over 40 hours per week to the AMKAD team while improving reporting accuracy and visibility.

Transnational Foods

Brickell, FL

AI & Automation Consultant, Part-Time

2026 – Present

- Lead an 8-workstream automation and BI program for two affiliated food & beverage importers spanning procurement, customs, container logistics, and finance; live systems eliminate 61+ hours of manual work weekly (~1.5 FTE).
- Presented inventory and working-capital analytics to senior finance leadership, converting executive direction into same-day changes: priced \$10.7M of excess stock, set a cash-based weekly purchasing ceiling, and deployed controls withholding \$41.7M in forecast-inflated purchase suggestions.
- Analyzed fill efficiency across 1,469 inbound ocean containers under cube and road-weight constraints, identifying ~63 containers' worth of purchased empty space and per-shipment consolidation opportunities.
- Automated U.S. customs (ISF) filing preparation and built an independent three-source audit (mailbox, ERP, broker) that exposed 35 falsely confirmed filings against 24-hour deadlines carrying \$5,000-per-violation penalties.

Kumo Capital (Private Equity Real Estate)

Hybrid

AI Intern

February 2026 – April 2026

- Constructed and deployed a cloud-hosted automation and data pipeline (n8n + Azure) to source and ingest commercial real estate investment opportunities, improving deal flow coverage and reducing manual sourcing time
- Designed a centralized PostgreSQL acquisitions database to structure and monitor property, ownership, and loan data, enabling scalable pipeline tracking and faster investment decision-making
- Built and trained a Claude-powered conversational agent that engages brokers via SMS/email to source, qualify, and advance deals, creating an AI-native outbound acquisition channel

Mercantil Bank Panama

Panama City, Panama

Commercial Intelligence Analyst

June 2024 – August 2024

- Developed 10+ executive-level analytics reports using Power BI for risk management, compliance, & corporate finance departments
- Engineered SQL databases for insurance and customer acquisition dashboards, processing international client data

RELEVANT PROJECTS

VerifyPago - Payment Verification Automation

May 2025 – Present

- Developed real-time payment verification SaaS targeting Venezuelan businesses, automating monitoring across Zelle, Binance P2P, and PayPal platforms integrable with WhatsApp and Telegram
- Designed comprehensive business model with freemium pricing strategy (\$9.99-\$49.99 tiers) after conducting market analysis of Venezuelan B2B segment
- Invented end-to-end solution reducing manual verification time by 90% for cash-based businesses
